FOUNDER PRIVACY & DYNASTY PROTECTION STRATEGY

ATTORNEY BRIEF · CONFIDENTIAL · PRIVILEGED & PROTECTED

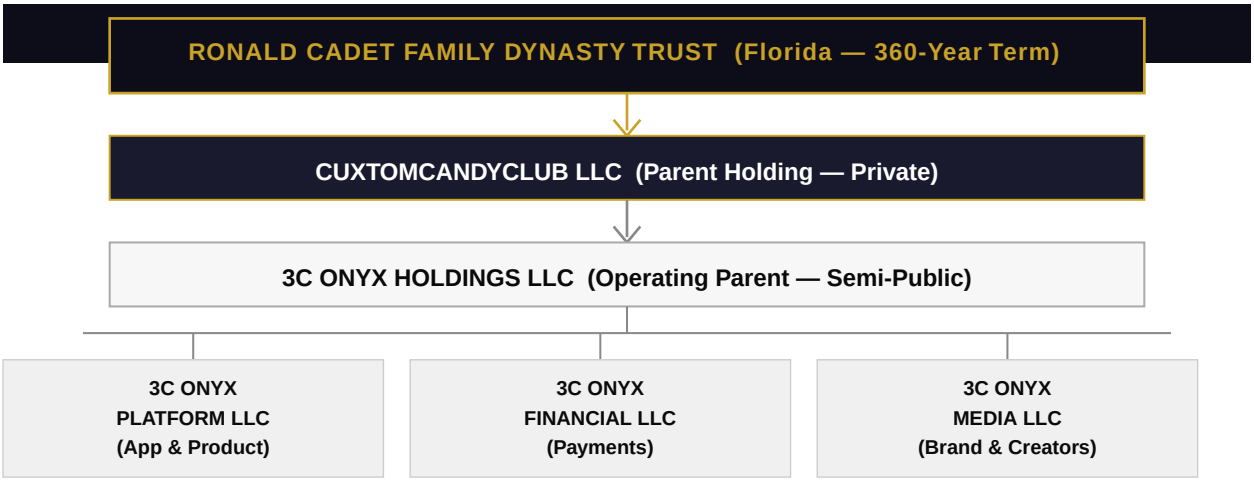
This brief outlines the legal structure required to operate 3C ONYX — a projected 1-billion-member global platform — while keeping the founding family completely removed from public visibility. The goal is permanent separation between the platform's public brand and the founder's personal identity, combined with generational wealth protection through a Florida Dynasty Trust.

01 THE CORE PRINCIPLE — BATMAN MODE

The 3C ONYX platform is designed to become one of the most recognized consumer brands in the world, serving 1 billion members across automotive, finance, and insurance verticals. The founding family — Ronald Antonio Cadet, his direct family, and entities he controls — must remain entirely invisible to the public throughout this growth.

This is not unusual for platforms of this scale. Koch Industries ($130B valuation), Cargill ($165B), and dozens of major financial platforms operate with complete founder anonymity. The legal mechanism that enables this is a layered corporate structure beneath a Florida Dynasty Trust.

02 REQUESTED CORPORATE STRUCTURE



Each subsidiary has its own operating agreement. The public interacts only with "3C ONYX." The ownership chain runs through two private LLCs to the Dynasty Trust. Florida law does not require private LLCs to publicly disclose their members or ownership percentages.
