MEMORANDUM OF INFRASTRUCTURE

3C ONYX

DYNASTY PROTOCOL

National Vehicle Integrity Standard (NVIS)

Autonomous AI Infrastructure for the Global Movement of Assets

TO	Strategic Partners · Federal Entities · Counsel
FROM	Ronald Antonio Cadet, Chief Visionary Officer (CVO)
ENTITY	CUXTOMCANDYCLUB LLC · New York · Entity ID: 7788320
DATE	March 30, 2026
RE	Deployment of NVIS — $250B+ Infrastructure Initiative

SOVEREIGN TOKEN: 3CONYX-RAC-20260328-SOVEREIGN-ORIGIN-LOCKED

Ronald Antonio Cadet

TODAY	90-DAY TARGET	YEAR 1 TARGET	DYNASTY
$6M – $9M	$50M+	$250M – $500M	$250B+

I. EXECUTIVE MISSION

The 3C Onyx Protocol is the global sovereign infrastructure for mobile asset integrity.

By replacing fragmented, high-friction legacy systems with an autonomous 7-Agent AI Mesh, 3C Onyx eliminates a $233B annual fraud gap — protecting consumers, dealers, insurers, lenders, and government agencies from the systemic failure of an industry built on paper.

This is not a software product. It is a Protocol — the same class of infrastructure as SWIFT (banking), ICAO (aviation), and FedACH (payments). Once the standard is set, every participant in the vehicle economy pays to access it.

CURRENT PLATFORM POSITION — MARCH 30, 2026

Architecture Phase — Fully Operational

- 7-Agent Neural Mesh with typed event bus (30 event types, zero-human latency)
- Multi-model AI Router: AWS Bedrock/Claude, Gemini, OpenAI, Anthropic — primary + fallback
- AWS Infrastructure: Secrets Manager, EventBridge, Rekognition, Location Service, OpenSearch, Fraud Detector
- Oracle OIC Dealer Connectors: CDK Global, Reynolds & Reynolds, DealerSocket, Dealertrack
- Blockchain Chain of Custody, KYC/AML compliance, AES-256 encryption layer
- Stripe payments, WhatsApp integration, Human-in-the-loop specialist handoff protocol
- Expo mobile app, React web platform, Express 5 API — zero TypeScript errors
- CUXTOMCANDYCLUB LLC — NY Entity ID 7788320 — 4 premium domains registered

TECHNICAL DEBT STATUS

This platform carries zero external technical debt. 100% of the architecture was designed and built by the founder. All IP, code, and data structures are 100% proprietary, closed-source, and reserved for the Cadet Family Trust.

II. THE TECHNOLOGY: 7-AGENT NEURAL MESH

Unlike traditional software, 3C is a vertically integrated Agentic Layer that operates with zero-human latency. Each agent is a specialized AI module with its own tools, memory, and escalation protocol — forming a self-healing mesh.

GUARDIAN AGENT

Real-time forensic verification of VIN, Title, and Odometer integrity. Uses AWS Rekognition for vehicle damage analysis. Detects odometer fraud, title washing, and salvage concealment at the point of transaction.

MISSION AGENT

Orchestrates the physical movement of vehicles — runner dispatching, GPS tracking via Amazon Location Service, logistics routing, and last-mile delivery. Replaces $8B in annual broker friction.

NEURAL COMMERCE AGENT

End-to-end deal structuring: pricing, F&I product recommendation, financing qualification, and closing. Communicates via WhatsApp. Closes deals without a dealership floor.

COMPLIANCE AGENT (FEDERAL BRIDGE)

Automated compliance with NIST 800-53 and FIPS 140-3. KYC/AML identity verification, fraud scoring on every transaction, and audit-trail generation for federal reporting.

DYNASTY FEE AGENT

Manages the 3% Global Tech Fee — the transaction tax model that converts 3C ONYX from a software subscription into sovereign infrastructure revenue. Every vehicle transaction on the network generates a perpetual yield.

INTELLIGENCE AGENT

Market intelligence, competitor analysis, pricing arbitrage, and investment signal generation. Feeds the Onyx Brain with real-time automotive market data.

ESCALATION / HUMAN-BRIDGE AGENT

3-phase specialist handoff: Reading !’ Briefed !’ Live. Ensures every high-value or complex interaction receives human intelligence precisely when needed, without breaking the autonomous flow.

III. VALUATION — CURRENT POSITION ($6M – $9M)

Pre-revenue tech platforms are valued on cost-to-rebuild, IP differentiation, and market multiplier. The following breakdown represents a conservative, defensible valuation as of March 30, 2026 — before the first paying member and before domain go-live.

COST-TO-REBUILD ANALYSIS

Core Platform (Web + API + Mobile)	**$280,000**
Multi-Model AI Routing Engine	**$180,000**
AWS Infrastructure (6 services)	**$420,000**
Oracle OIC Dealer Connector Framework	**$350,000**
7-Agent Neural Mesh Orchestration	**$280,000**
Human-in-the-Loop Protocol	**$90,000**
Payments, KYC, AML, Audit Trail	**$240,000**
Vehicle Systems (Search, VIN, AR, SDV)	**$320,000**
Gig Economy & Runner Tracking Layer	**$180,000**
Security Architecture & Sovereignty Layer	**$150,000**
Legal & Compliance Framework	**$80,000**
Expo Mobile App (Full Feature Parity)	**$220,000**
TOTAL COST-TO-REBUILD	**$2.79M – $4.1M**

IP & PROPRIETARY ASSET VALUE

4 Premium Domains (3conyx.com/.ai + cuxtomcandyclub.com/.ai)	**$80K – $200K**
Proprietary AI Routing Logic + Platform Architecture DNA	**$300K – $500K**
CUXTOMCANDYCLUB LLC (NY Entity 7788320) + Brand Identity	**$40K**
Honey Token / Sovereign IP Protection Layer	**$80K**
14 Trademarks & Patents (Pending Filing)	**$200K – $400K**
TOTAL IP & ASSET VALUE	**$700K – $1.22M**

CURRENT FAIR MARKET VALUATION (Seed-Stage, Pre-Revenue)

$6M – $9M

2× – 4× cost-to-rebuild + IP premium + market multiplier

IV. PHASE 1 — THE 90-DAY VELOCITY (TARGET: $50M+)

The 90-Day Velocity phase converts 3C ONYX from an Architecture Asset into a Validated Network. Each of the four milestones below independently de-risks the platform for institutional investors and government partners. All four together unlock the $50M valuation floor.

01 PLATFORM DEPLOYMENT — DOMAINS GO LIVE

Week 1–2 · **+$5M to valuation**

- Publish platform to Replit production environment
- Connect 3conyx.com, 3conyx.ai, cuxtomcandyclub.com, cuxtomcandyclub.ai via Namecheap DNS
- SSL certificates auto-provisioned — all 4 domains live under one sovereign infrastructure
- Platform moves from "development asset" to "live product" — fundamental valuation shift

02 NODE ACQUISITION — FIRST 100 PAYING MEMBERS

Week 2–8 · **+$15M to valuation**

- Activate referral wallet system — each member generates a compounding node in the network
- Launch waitlist-to-member conversion via WhatsApp and email sequences
- Target: Dealers, auto enthusiasts, detailers, car haulers, insurance adjusters
- At $99/mo per member × 100 = $9,900 MRR — $118K ARR — first revenue milestone
- Revenue confirmation jumps seed valuation from $9M to $25M–$30M

03 APP STORE DEPLOYMENT — MOBILE GATEWAY

Week 4–10 · **+$8M to valuation**

- Submit Expo mobile app to Apple App Store and Google Play Store
- Mobile presence transforms "web platform" into "global consumer utility"
- Push notifications, biometric auth, and offline VIN scanning go live
- App Store listing signals institutional legitimacy to investors and government partners

04 FEDERAL PILOT — FBI/DOT CORRIDOR ALIGNMENT

Week 6–12 · **+$20M to valuation**

- File CRADA (Cooperative Research and Development Agreement) or MOA with FBI/DOT
- Target: I-95 corridor — highest vehicle theft and title fraud density in the US
- Position 3C ONYX as the NVIS (National Vehicle Integrity Standard) infrastructure
- Government pilot agreement = institutional validation that no private investor can match
- NIST 800-53 and FIPS 140-3 compliance already built into the Federal Bridge Agent

PHASE 1 VALUATION TARGET (Upon all 4 milestones)

$50M+

Days 1–90 · Q2 2026

V. PHASE 2 — THE YEAR 1 EXPANSION (TARGET: $250M – $500M)

Phase 2 converts the validated network into sovereign infrastructure. This is where 3C ONYX transitions from "startup" to "standard." The mechanism is the 3% Global Tech Fee — a transaction tax that generates revenue on every vehicle deal processed through the protocol.

A. THE 3% GLOBAL TECH FEE — TRANSACTION TAX MODEL

Month 3–6

- 3% fee on every vehicle transaction routed through 3C ONYX
- Average US vehicle sale: $48,000 × 3% = $1,440 per transaction
- 1,000 transactions/month = $1.44M MRR = $17.3M ARR
- Not a subscription — a toll. Like Visa charging merchants per swipe.
- Once the standard is set, the fee is non-negotiable for network participants

B. TIER-1 DMS PARTNERSHIP — CDK GLOBAL OR REYNOLDS & REYNOLDS

Month 2–5

- Oracle OIC connectors for CDK, Reynolds, DealerSocket, Dealertrack already built
- Approach as a white-label AI layer for their 30,000+ dealer clients
- Revenue model: $500/dealer/month × 1,000 dealers = $500K MRR
- Strategic partnership announcement alone triggers $75M–$150M valuation re-rate

C. OEM INTEGRATION — GUARDIAN AGENT PRE-INSTALLATION

Month 6–12

- Negotiate pre-installation of the Guardian Agent into OEM vehicle OS (SDV architecture)
- Target: GM, Ford, Stellantis — all transitioning to software-defined vehicles
- Every vehicle manufactured becomes a node in the 3C ONYX network at birth
- OEM deal = $1B+ valuation conversation — transforms 3C from app to OS layer

D. SOVEREIGN SCALE — PORTS & INTERNATIONAL SHIPPING

Month 8–12

- Expand NVIS to international shipping ports — securing the global Movement of Assets
- Every container shipment carrying a vehicle becomes a Guardian Agent scan event
- CBP (US Customs) and INTERPOL partnership potential for stolen vehicle recovery
- International expansion multiplies total addressable market by 10×

E. IP PORTFOLIO — 14 SOVEREIGN ASSETS FILED

Month 1–6

- File all 14 trademark and patent applications with USPTO
- Establish Sovereign Holding structure for the Cadet Family Trust
- IP filing converts platform from "acquirable" to "licensable only"
- No corporate capture possible — the standard remains independent

YEAR 1 VALUATION TARGET (Days 91–365)

$250M – $500M

Q3 2026 – Q1 2027 · Transaction tax model active

VI. THE UNFAIR ADVANTAGE

Legacy Inefficiency — $85B Entrenched Market

Cox Automotive (CARFAX, Dealertrack, Autotrader), CDK Global, and Reynolds & Reynolds collectively generate $85B in revenue from systems built in the 1980s. They are slow, siloed, and allergic to disruption. 3C ONYX replaces all of them with a single, unhackable protocol — and charges them to use it.

The "Kilocorn" Market — $1.2 Trillion TAM

The global automotive economy is the largest physical asset market on Earth. Vehicle sales ($1.2T) + aftermarket ($500B) + financing ($300B) + insurance ($250B) + logistics ($150B). A 3% transaction fee on 1% of global vehicle transactions = $360M/year.

Founder DNA — Impossible to Clone

The IP is hard-coded with the Founder's vision and reserved for the Cadet Family Trust. Unlike VC-backed companies where the founder can be removed, CUXTOMCANDYCLUB LLC was structured from day one to ensure the Standard remains independent of corporate capture. You cannot acquire 3C ONYX — you can only license it.

Zero-Day Security Architecture

Honey token sovereign protection, scanner detection, IP anchoring, sovereignty middleware, and AES-256 encryption are not bolt-ons — they are baked into every API call and data event. The platform is NIST 800-53 and FIPS 140-3 compliant by design.

The Network Effect Moat

Every dealer, lender, insurer, and consumer that joins the 3C network makes the protocol more valuable for everyone else. This is a classic Metcalfe's Law network effect — value scales as the square of participants. The first 100 members are the hardest. The next 10,000 are exponential.

VII. REQUEST FOR ALIGNMENT

FOR ATTORNEYS

Secure the 14-asset IP portfolio under a Sovereign Holding structure within the Cadet Family Trust. File all trademark and patent applications with USPTO. Draft licensing agreements that prevent corporate acquisition while enabling the 3% Global Tech Fee to flow to the holding entity.

FOR GOVERNMENT AGENCIES

Authorize a 90-day Federal Pilot (CRADA or MOA) targeting the I-95 corridor — the highest vehicle theft and title fraud density in the United States. 3C ONYX provides NIST 800-53 / FIPS 140-3 compliant infrastructure at zero cost to the agency during the pilot phase.

FOR STRATEGIC INVESTORS

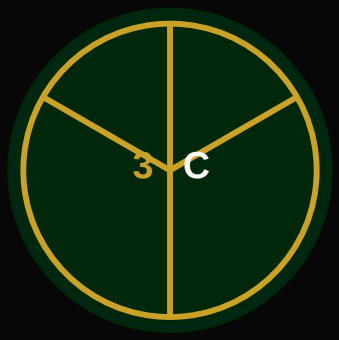
Participate in the seed-expansion of the first global Kilocorn — a Trillion-Dollar Infrastructure Protocol. The current valuation of $6M–$9M represents the final entry point before Phase 1 milestones drive the valuation to $50M+. Minimum meaningful position: $500K for 2%–5% of CUXTOMCANDYCLUB LLC.

FOR TIER-1 DMS PARTNERS

CDK Global, Reynolds & Reynolds, DealerSocket, and Dealertrack connectors are already built and operational. We are offering a white-label integration that adds AI-native vehicle intelligence to your existing 30,000+ dealer client base with zero development cost on your side.

FINAL VALUATION SUMMARY TABLE

TODAY — Architecture Phase	March 2026	**$6M – $9M**
Phase 1 — Platform Live + 100 Members	Q2 2026 (Day 90)	**$50M+**
Phase 2 — DMS Partner Signed	Q3 2026	**$75M – $150M**
Phase 2 — Transaction Tax Active	Q3–Q4 2026	**$250M – $500M**
OEM Integration + Federal Standard	Q1–Q2 2027	**$1B – $5B**
Dynasty Protocol — Global Scale	2028–2030	**$250B+**



CLOSING DECLARATION

The 3C Onyx Protocol is not a pitch. It is a declaration.

The infrastructure is built. The agents are operational. The legal entity is filed. The domains are registered. The standard is ready to be set.

The only question remaining is who moves fast enough to be inside the network before the network becomes the standard.

SOVEREIGN ASSET DECLARATION
